A Introduction

The centralised, fundamentally autonomous and uniform procedure for the grant of European patents, introduced by the European Patent Convention (EPC), is linked in a special way with the national patent law of the Member States of the European Patent Organisation, and at a number of stages it "interfaces" with the national legal systems – a feature essential to smooth interaction between European and national law. In each of the Contracting States for which it is granted, the European patent has the effect of and is subject to the same conditions as a national patent granted by that State, unless otherwise provided in the EPC (Article 2, paragraph 2, EPC).

The salient characteristic of these interfaces is that, at the outset or in the course of the European grant procedure or after it has been completed, the patent applicant or proprietor may or must take certain steps before the patent authorities of the Contracting States in order to acquire or maintain certain rights in those States. It is therefore of primordial importance for all European applicants and proprietors to be familiar with and carefully observe such procedural steps laid down by national law and the conditions for their validity, if full advantage is to be derived from the European patent system and loss of rights is to be avoided.

This booklet is intended by the European Patent Office as a concise and reliable guide to the most important provisions and requirements of the national law of the Contracting States applicable to European patent applications and patents, for the use of European patent applicants and proprietors and all others concerned with the European patent system. It may be considered as it were a "Guide to the Euro-legislation of the Contracting States on patents" and thus supplements the guide for applicants – "How to get a European patent". The synopses given in the following tables have been prepared in close collaboration with the authorities of the Contracting States responsible for the protection of industrial property, to which the EPO is indebted for their active support and numerous valuable suggestions.

Although we have exercised the greatest care in drawing up the tables, we cannot vouch for the absolute completeness and accuracy of the information given. If only because of their conciseness and the fact that they concentrate on the bare essentials, the tables can be no substitute for consultation of the national legal sources themselves, supplemented where appropriate by professional advice from authorised persons. After all, despite the latest reforms, thorough as they have mostly been, national patent law and practice are not static phenomena but are constantly changing and, of necessity, developing. As a result, it is not even possible to state with any certainty that the legal provisions summarised in the tables will not have been changed by the time this booklet appears. In particular, the reader should not assume that the official fees given at various points in the tables have not been increased in the meantime. It is therefore advisable always to refer back to the official publications of the Contracting States so as to keep up to date with the development of national legislation and official practice. The EPO will continue to provide regular and, as far as possible, up-to-date coverage in its Official Journal of legal developments in the Contracting States.

In view of the multiplicity and varying nature of the individual Contracting States' provisions governing European patent applications and patents and of the fact that the national patent offices and courts have scarcely had time to adopt a consistent line on their application, the EPO realises that these tables are only a first step and that they will require constant improvement and refinement if they are to serve their purpose satisfactorily. Criticism and suggestions are therefore always welcome.

I. National Legal Bases

This table lists (not necessarily all) the Contracting States' important national legal sources (laws, regulations, decrees etc.) of significance for European patent applications and patents and, for the most part, also referred to in the subsequent tables. The title of these legal sources is given in the official language of the Contracting States in question. Where necessary, a translation in the official language of the EPO in which this summary is published is given underneath in italics in square brackets. To keep this table within a reasonable size, the "original title" in the case of States with more than one official language is given only in the language which is also one of the official languages of the EPO.

The dates on which the various items of referenced legislation entered into force have not been included, as this would have cluttered up the tables – especially in cases where some Articles of certain laws and regulations entered into force at different times.

Where the Office knows of translations into one of the official languages of the EPO of the legal sources listed, these are referenced. It should be noted, however, that these translations are not always up-to-date and that at all times only the original version given in the official publications is the authentic text.

The abbreviations used in the subsequent tables have been introduced for the sake of clarity and do not always coincide with the official abbreviations used in the Contracting States.

II. Filing of European patent applications pursuant to Article 75, paragraphs 1(b) and 2, EPC

European patent applications may be filed at the EPO at Munich, its branch at The Hague or, if the law of a Contracting State so permits, at the central industrial property office or other competent authority of that State.

The following table indicates, for each Contracting State, whether European patent applications may be filed at the option of the applicant at the EPO or a national authority, which applications must be filed with the national authorities, the languages in which European patent applications are accepted by the national authorities and what special features need to be borne in mind in connection with the filing.

For the purpose of filing an application, a national representative does not need to be appointed if the applicant has neither a residence nor his principal place of business within the territory of the State concerned (Article 133, paragraphs 1 and 2, EPC).

Attention is drawn to the fact that a translation in respect of every application which is not in English, French or German must be filed in one of these languages within three months after the filing of the European application, but no later than 13 months after the date of priority (Article 14, paragraph 2, Rule 6, paragraph 1, EPC). If this translation is not filed in due time, the application is deemed to be withdrawn (Article 90, paragraph 3, EPC).

European divisional applications must always be filed directly with the EPO at Munich or its branch at The Hague (Article 76, paragraph 1, EPC).

With regard to the languages specified in column 3, applicants are recommended to file applications where possible in the official language(s) of these States as difficulties of communication may arise – in particular in the case of States which have to examine applications in the light of national security regulations – possibly resulting in European patent applications being deemed to be withdrawn because of non-observance of the time limit for forwarding such applications (Article 77, paragraph 5, EPC).

III. A. Rights conferred by a European patent application after publication pursuant to Article 93 EPC (Article 67 EPC)

B. Filing of translations of the claims pursuant to Article 67(3) EPC

Under Article 67, paragraph 1, EPC, from the date of its publication under Article 93 EPC a European patent application provisionally confers on the applicant such protection as is conferred by Article 64, in the Contracting States designated in the application as published, i. e. the same rights as would be conferred by a national patent granted in those States.

Pursuant to Article 67, paragraph 2, however, Contracting States may confer protection which is less than that referred to in Article 64 EPC. That protection may not, though, be less than that which would result from publication of an unexamined national patent application. The applicant must at least be given the right to claim compensation reasonable in the circumstances from an unauthorised user.

A further exception to the basic rule in Article 67, paragraph 1, is laid down in Article 67, paragraph 3, regarding the date from which provisional protection is effective. Under that provision any Contracting State which does not have as an official language the language of the proceedings may prescribe that provisional protection shall not be effective until such time as a translation of the claims in one of its official languages at the option of the applicant or, where that State has prescribed the use of one specific official language, in that language:

- (a) has been made available to the public in the manner prescribed by national law, or
- (b) has been communicated to the person using the invention in the said State.

No time limits are prescribed for filing the above-mentioned translations in the Contracting States: provisional protection in the individual Contracting States becomes effective only when the conditions referred to in Article 67, paragraph 3, EPC have been fulfilled.

IV. Filing of translations of the patent specification under Article 65 EPC

Under Article 65, paragraph 1, of the European Patent Convention, any Contracting State can prescribe that if the text, in which the European Patent Office intends to grant a European patent or maintain a European patent as amended for that State, is not drawn up in one of its official languages, the applicant for or proprietor of the patent must supply to its central industrial property office a translation of this text in one of its official languages at his option or, where that State has prescribed the use of one specific official language, in that language.

Of the 11 Contracting States, eight, namely Austria, Belgium, France, Italy, Liechtenstein, Netherlands, Switzerland and Sweden, have enacted provisions under Article 65, paragraphs 1 and 2, EPC. All these States have prescribed, in accordance with Article 65, paragraph 3, EPC, that in the event of failure to observe the relevant national provisions, the European patent will be deemed to be void *ab initio*. The circumstances in which such a loss of rights occurs are determined by the national law of the Contracting States concerned. In the Contracting States Austria, France, Italy, Sweden and Switzerland/Liechtenstein re-establishment of rights in the event of failure to observe the time limit for filing the translation (cf. Column 2) is possible subject to the requirements of the national law of the State concerned.

The Contracting States Federal Republic of Germany, Luxembourg and the United Kingdom, do not at present require a translation of the European patent specification.

With the exception of Belgium (see "Special features" column in the table) no State with more than one official language has prescribed a specific official language for the translation.

The following table contains information regarding each of the aforementioned States, which should be of assistance to applicants in filing the translation of the patent specification with the central industrial property office. It also contains information as to how the translations filed will be made available to the public.

Provided the remaining national requirements are met, translations of the patent specification are deemed in all the Contracting States concerned to have been duly filed even if the address for service required is indicated, or a national representative appointed, only after the date of filing (or within any time limit set by the national patent authorities).

If, because of the reservation made by Austria (cf. Table IX, Column 1) or in the event of national prior rights (Article 54 (3), Rule 87 EPC), the European patent application contains different sets of claims for different States, only a translation of the set of claims applicable to the State in question need be filed.

V. Authentic text of a European patent application or European patent (Article 70 EPC)

In any proceedings before the European Patent Office and in any Contracting State the text of a European patent application or a European patent in the language of the proceedings is the authentic text.

Any Contracting State may provide that a translation, as provided for in the Convention, in an official language of that State, shall in that State be regarded as authentic, except for revocation proceedings, in the event of the application or patent in the language of the translation conferring protection (Article 69 EPC) which is narrower than that conferred by it in the language of the proceedings.

Any Contracting State which adopts a provision of this kind

- (a) must allow the applicant for or proprietor of the patent to file a corrected translation of the European patent application or European patent;
- (b) may prescribe that any person who, in that State, in good faith is using or has made effective and serious preparations for using an invention the use of which would not constitute infringement of the application or patent in the original translation may, after the corrected translation takes effect, continue such use in the course of his business or for the needs thereof without payment (Article 70, paragraph 4(b), EPC).

The following table indicates which text of a European patent application or European patent is authentic in the event of translations pursuant to Articles 67(3) and 65(1) EPC being filed, and whether a State has made provision for use in good faith in the meantime as provided for in Article 70, paragraph 4(b), EPC.

Contracting State	1 Authentic Text of a European patent application or European patent	2 Has provision pursuant to Art. 70 (4)(b) been made?
Austria	Translation, if protection conferred is narrower than in the language of the proceedings. § 6(1) ILPT	Yes § 6(6) ILPT
Belgium	No provisions pursuant to Art. 70(3) EPC. Authentic text is that in the language of the proceedings.	–

Netherlands	No provisions pursuant to Art. 70(3) EPC. Authentic text is that in the language of the proceedings.	–
Sweden	Translation, if protection conferred is narrower than in the language of the proceedings. § 90 PA	Yes § 91(3) PA
Switzerland/ Liechtenstein	Translation, if protection conferred is narrower than in the language of the proceedings. Art. 116(1) PA	Yes Art. 116(2), (3) PA
United Kingdom ²	No provisions pursuant to Art. 70(3) EPC. Authentic text is that in the language of the proceedings.	–

¹ Contracting State requires only a translation of the claims pursuant to Art. 67(3) EPC.

² Contracting State at present requires neither a translation of the claims pursuant to Art. 67(3) EPC nor a translation of the patent specification pursuant to Art. 65(1) EPC.

VI. Payment of renewal fees for European patents

Under Article 141 EPC, "national" renewal fees in respect of a European patent may be imposed for the years which follow that in which the mention of the grant of the European patent is published in the "European Patent Bulletin". Further information on the calculation of the patent years for which "national" renewal fees are to be paid is published in Official Journal 4/1980, p. 100.

The following table indicates the most important national provisions and requirements to be observed when paying "national renewal fees" in respect of European patents. It takes no account of national provisions concerning reductions in renewal fees in connection with licensing rights, or of any stipulations applying to the possibilities of extending or deferring payment.

Irrespective of the information given in column 3 of the following table the minimum period referred to in Article 141(2) is decisive for all Contracting States i.e. "national" renewal fees in respect of a European patent falling due within two months of the publication of the mention of the grant of the European patent are deemed to have been validly paid if they are paid within that period. Any additional fee provided for under national law will not be charged.

Attention is particularly drawn to the fact that the fees given in Columns 1 and 3 are frequently subject to change in various Contracting States. The EPO can therefore accept no responsibility for the validity of those figures. As in the past, however, it will endeavour to report such changes as soon as possible in the Official Journal.

VII. Conversion of European patent applications or patents into national patent applications or patents

1. Basis for conversion

Under Article 135, paragraph 1, EPC, the central industrial property office of a designated Contracting State may apply the procedure for the grant of a national patent at the request of the applicant for or proprietor of a European patent, in the following circumstances:

- (a) where the application is deemed to be withdrawn pursuant to Article 77, paragraph 5, (delay by national authorities in forwarding the European application) or Article 162, paragraph 4, (European patent application cannot be processed as a result of the procedure being restricted to certain areas of technology)¹;
- (b) in such other cases as are provided for by the national law in which the European patent application is refused or withdrawn or deemed to be withdrawn, or the European patent is revoked under the EPC.

2. Time limit for filing the request for conversion

The request for conversion must be filed within three months after the date on which

- (a) the European patent application has been withdrawn or
- (b) notification has been received that the application is deemed to be withdrawn, or
- (c) notification of a decision refusing the application or revoking the European patent has been received.

The equivalence of the European patent to a regular national filing lapses if the request is not filed in due time (Article 135, paragraph 2, EPC).

3. Submission of the request for conversion

- (a) Unless the European patent application is deemed to be withdrawn pursuant to Article 77(5) EPC, the request for conversion must be filed with the European Patent Office. It is not deemed to be filed until the conversion fee of DM 60 (or the equivalent in other currencies pursuant to Article 6, paragraph 4, of the Rules relating to Fees) has been paid to the Office (Article 136, paragraph 1, EPC).

- (b) If the applicant has been notified that the European patent application is deemed to be withdrawn pursuant to Article 77, paragraph 5, EPC, the request must be filed with the central industrial property office with which the application was filed (Article 136, paragraph 2, EPC).

4. Transmission of the request

- (a) The requests for conversion which must be filed with the European Patent Office (cf. 3(a) above) are transmitted by the Office to the central industrial property offices of the Contracting States specified therein, accompanied by a copy of the files relating to the European patent application or the European patent (Article 136, paragraph 1, EPC).
- (b) Where the request for conversion has to be filed with a national patent office (cf. 3(b) above), that Office, subject to the provisions of national security, transmits the request, together with a copy of the European patent application, directly to the central industrial property offices of the Contracting States specified by the applicant in the request. The effect referred to in Article 66 EPC (i.e. equivalence of the European patent application to a regular national filing in the Contracting States designated) lapses if the request for conversion is not transmitted within twenty months after the date of filing or date of priority (Article 136, paragraph 2, EPC).

5. Explanatory notes concerning the table

The table below indicates the basis for conversion under the national law of all the Contracting States to the EPC and contains useful information regarding the formal requirements of the competent national authorities, the time limits involved and regulations concerning representation or addresses for service if the applicant or his representative before the EPO has neither a residence nor his principal place of business in the Contracting States in question.

All European patent applications transmitted pursuant to Article 136 EPC are governed by Article 137, paragraph 1, EPC, which lays down that these applications may not be subjected to formal requirements of national law which are different from or additional to those provided for in the EPC.

The translation referred to in the table should be understood to mean a translation of the original text of the European patent application and, where appropriate, of the text, as amended during proceedings before the EPO, which the applicant wishes to submit to the national procedure (Article 137, paragraph 2(b), EPC).

¹ Article 162, paragraph 4, is irrelevant to applications filed since 1 December 1979 (OJ 10/1979, p. 443). This reason for conversion is therefore not included in the table.

VIII. Payment of fees

A number of "national fees" are payable to the patent authorities of the Contracting States in connection with the provisions of the EPC (see Tables II, III, IV, VI, VII).

The purpose of the following Table is to facilitate these fee payments by setting out some useful information regarding national legal provisions, accounts held by patent authorities, permissible methods of payment and date considered as the effective payment date.

There is no special mention of common principles and practice governing payment transactions, such as the requirement to state the name of the person making payment and the purpose of the payment and to specify the patent application number or publication number.

References to banks, post offices or postal giro offices denote only the relevant institution or office within the territory of the Contracting State in question.

When making payments, allowance should be made for charges which may be levied by banks, especially on incoming foreign transfers, and which it is not the responsibility of the national patent authorities to pay.

IX. Miscellaneous

The following table sets out information on

- (a) the reservations possible under Article 167, paragraph 2 EPC
- (b) the enactment of national provisions on the question of double protection under Article 139, paragraph 3 EPC
- (c) the territorial field of application of the EPC, pursuant to Article 168, paragraph 3 EPC

(a) Reservations

The possible reservations are listed individually in Article 167, paragraph 2(a) to (d) EPC. Only one Contracting State has made reservations pursuant to Article 167, paragraph 2 EPC, and these concerned the effectiveness of protection for chemical, pharmaceutical or food products as such (Article 167, paragraph 2(a)) and the binding nature of the Protocol on Recognition (Article 167, paragraph 2(d)).

(b) Simultaneous protection

Under Article 139, paragraph 3 EPC, any Contracting State may prescribe whether and on what terms an invention disclosed in both a European patent application or patent and a national application or patent having the same date of filing or, where priority is claimed, the same date of priority, may be protected simultaneously by both applications or patents.

The individual provisions enacted in connection with Article 139, paragraph 3 EPC are indicated in column 2 of this table.

(c) Territorial field of application

Under Article 168, paragraph 1, any Contracting State may declare in its instrument of ratification or accession, or may inform the Government of the Federal Republic of Germany by written notification any time thereafter, that the Convention shall be applicable to one or more of the territories for the external relations of which it is responsible. European patents granted for that Contracting State also have effect in the territories for which such a declaration has taken effect.

The current situation regarding territorial field of application in the individual Contracting States is displayed in column 3 of the table.
